Training for IOSH accredited Working & Managing Safely

Background

University Hospitals Bristol and Weston NHS Foundation Trust (UHBW) is one of the largest acute Trusts in the country, bringing together a combined workforce of over 13,000 staff and over 100 different clinical services across 10 different sites, serving a core population of more than 500,000 people across South West England. The Trust has many and varied career opportunities for you to choose from.

UHBW has been rated by the CQC as 'Good' overall and our staff are proud to deliver excellent care to the people of Bristol, Weston and beyond. As a forward-thinking multi-award winning Trust and a digital exemplar committed to improving patient care, our world-leading research and innovations are having a positive local and global impact.

Solution

University Hospitals Bristol and Weston have utilised Hydro-X to deliver training in IOSHaccredited Working and Managing Safely. This includes offering Competence to Enter Electrical Switch Rooms for non-electrical tradesmen and managers, as well as providing Asbestos Awareness training for their trade staff.

Feedback

"We have found that the courses have been well organised to meet our needs and provided good flexibility within the requirements. Hydro-X have trained 67 of our staff for the IOSH Working Safely and Managing Safely and we have order places for a further 24 places for this year. We have found the training to be a good fit for our organisation, well organised and the trainer has engaged well with the delegates. The asbestos awareness was one of the most engaging asbestos courses I have attended"

If you are requiring support with a remediation project or you are simply looking to improve fire safety within your premises then look no further than our air division.

Training Services delivered by Hydro-X Training.
